Education

Bilkent University   July 2021
Bachelor of Science -Department of Computer Engineering   *Ankara, Turkey*
- **Relevant Coursework:** Algorithms & Complexity(C++), Database Systems, Information, Retrieval Systems, Linear Programming, Computer Vision, Application Lifecycle Management, Software Verification and Validation, Software Engineering Project Management

Experience

Axiom Cloud   Jan 2023 – October 2023
Software Engineer   *Boston, MA—Remote*
- Worked as a backend developer. Automated the manual process of onboarding a new site to the apps, and detecting/reacting to leaks. Improved team productivity.
- **Skills**: Airflow · Python (Programming Language) · Kubernetes · Amazon Web Services (AWS) · Professional Scrum Master (PSM I)

Uplight   Dec 2021 – Jan 2023
Software Engineer   *Boston, MA*
- Worked as a backend developer in a new platform. The project's objective was to simplify an existing platform that sends informative emails and sms to energy customers and make it more customizable for different providers.
- Participated in the following stages of the new platform: planning, implementation, testing, deployment, and maintenance.
- **Skills**: Python · Google Cloud Platform (GCP) · SQL · Amazon Web Services (AWS) · Jira · Postman API · Database Administration

Jotform   June 2021- July 2021
Software Engineer Intern   *San Francisco, CA—Remote*
- Worked as a full stack developer. Redesigned and implemented responsive advanced settings on the enterprise admin system.
- Participated in the following stages of the new platform: planning, implementation, testing, deployment, and maintenance.
- **Skills**: Python · ReactJS · Jira · and Postman API

Ekin   August 2020- March 2021
Software Engineer Intern, Part-time Software Engineer   *Ankara, Turkey*
- Worked as a full stack developer. Designed and implemented the settings page on digital twin system for smart city management project.
- After my internship started working as a part-time software engineer in the artificial intelligence team. Participated in deep learning projects from data labeling to model training and testing. My work included data engineering: extracting, transforming, and loading.
- **Skills**: AngularJS · Node.js · MongoDB · Python · Machine Learning · Data Analysis · PyTorch

Technical Skills

Languages: Python, Java, JavaScript, C++
Technologies: React.js, Angular, Vue.js, Django, Flask, Spring Boot, Selenium, TensorFlow, PyTorch, Airflow, Kubernetes
Concepts: Full Stack Development(Frontend and Backend), Operating Systems, Artificial Intelligence, Agile Methodology, Cloud Computing, Agile Methodologies0
Certifications: PSM I Professional Scrum Master I Certificate, Deutsches Sprachdiplom B1

Projects

A full list of releases, demos, and source codes of my projects can be found in my website.
